Polarized-Media Electronic Air Cleaner

By **dynamic**
Air Quality Solutions

Eliminate dirt and biological growth inside your heating and cooling system that cause equipment breakdowns, higher utility bills and aggravate health problems.

98% of all airborne particles are so small that even the best disposable filter can't collect them.

Replacing your filter with a **high efficiency air cleaner** will protect your heating and cooling equipment and improve the indoor air quality.

The Dynamic Polarized-Media Electronic Air Cleaner supports the proper air flow and high-intensity air cleaning that controls sub-micron particles to promote cleaner, fresher and healthier air.

- Removes mold's food source
- 97% capture rate @ .3 microns
- Removes respirable particulates
- Traps some odors and gases
- Installs into existing filter tracks
- Easy media pad replacement
- Efficiency increases as it loads
